

Intro to MLEP

총점 10

1. Static datasets are used for production ML modeling.

1 / 1점

☒ False

☐ True

✓ 맞습니다

That's it! Dynamic real-world data is used.

2. In production ML, the design priority is fast training.

1 / 1점

☒ No

☐ Yes

✓ 맞습니다

Correct! Fast training and choosing a high-performance algorithm are the design priorities for prototypes or research ML.
