

3. Is the Data pipeline vital for the success of the production ML system?

1 / 1점

☐ No

☒ Yes

✓ 맞습니다

Exactly! It consists of the incredibly important steps to the production ML system success.

4. What do you apply to maximize predictive signals in your data?

1 / 1점

☒ Feature engineering

☐ Data coverage

☐ Data formatting

☐ Feature selection

✓ 맞습니다

You've figured it out! Feature engineering is the process of using domain knowledge to extract features with high levels of predictive signal from raw data.

5. Your training data should reflect the diversity and cultural context of the people who will use it. What can be done to
