

4. You are building a system to detect cats. You ask labelers to please “use bounding boxes to indicate the position of cats.” Different labelers label as follows:

1 / 1점

What is the most likely cause of this?

- ☐ Labelers have not had enough coffee.
- ☐ Lazy labelers.
- ☒ Ambiguous labeling instructions.
- ☐ That this should have been posed as a segmentation rather than a detection task.

✓ 맞습니다

That's right! Your hardworking labelers may interpret the ambiguous instructions differently and label the images differently. Improve your instructions, and your labelled data will improve!
