궁핍니니

You've got it right!

2. In a pre-processing training dataset, all transformations that are carried out must be done in the serving set:

1 / 1점

- False
- True

✓ 맞습니다

Perfect! Also, this is considered a con, as it can produce slower iterations being less efficient than in the training.

3. What statement is true about TensorFlow Transform?

1 / 1점

- TF Transform eliminates the training serving skew
- In a TFX pipeline, this component is usually placed after TF trainer
- TF Transform Analyzers are run during training and serving time
- TF Transform requires specifying preprocessing steps at serving time

✓ 맞습니다

Good call! TF Transform uses the same code path for both training and serving.
