9. **Production grade machine learning** challenges are addressed by implementing an important concept:

1 / 1점

- ◉ Machine learning pipelines
- ○ Directed Acyclic Graphs (DAGs)
- ○ Orchestrators
- ○ Tensorflow Extended (TFX)

✓ 맞습니다

Spot on! ML pipelines provide support for automating, monitoring and maintaining a model as you continue to train it over its lifetime.

10. TensorFlow Lite is a deep learning framework to deploy TFX pipelines into:

1 / 1점

- ◉ Mobile devices
- ○ Web browser
- ○ Servers

✓ 맞습니다

That's it! Tensorflow Lite is the tool for deploying TFX pipeline into mobile and IoT devices.
